

# Sensory Garden Project

Presented By  
**Chantal Cardoso,**  
**BTR, CTRS**  
Donor Care & Special  
Projects Coordinator

April 2023

## Contribution Request

We need volunteer and donor support to help launch our Sensory Garden Project:

- Supplying all materials to build raised garden beds (soil, plants, and tools)
- Building raised garden beds and delivering to Hawthorne Seniors Care

# Care is at the heart of Hawthorne - working together to make a difference

In our long term care program: we provide a home to 131 residents: 75 seniors who live in our Complex Care program and 56 residents who reside in our Dementia Care Cottages. We also have our community programs: assisted living program where we provide a home to 70 tenants, and we support 75 community clients in our Adult Day Program. Hawthorne is truly a campus of care.

---

*"I go to the garden to find  
peace & I feel connected  
to nature there"*

- *Hawthorne Resident*

## Benefits of Sensory Gardens for Seniors

Research supports Sensory gardens and horticultural activities have increasingly provided suitable therapeutic environments and improved sleeping patterns in dementia care. The ultimate purpose of providing therapeutic settings in dementia treatment and care is to ***improve the functional level, satisfaction, well-being, and quality of life.***

We thank you for your support and assistance to complete our care community projects
